

# Mobile <sup>4 Channel</sup> DIGITAL VIDEO RECORDER

Mobile digital video recorders (DVR) by LC Tech Solutions Inc. feature the power of most full-function high-end DVR's with a portable ruggedized profile that is specially designed with anti-shock and vibration mechanisms, that ensure peak uninterrupted performance. Unlike any other system, this Mobile DVR can operate under the most extreme operating environments. From arctic to desert temperatures, it performs flawlessly. The Mobile DVR operates over the latest Mobile Ad Hoc Wireless Networking Technology (MANET), which allows real-time "hack-proof" remote monitoring at distances of over 20 miles. Video and audio can be automatically uploaded for remote storage to a central data server without human operator intervention using secure wireless transmission.

Wearable button camera microphone transmits video and audio to mobile DVR
